Better overview - less keys to press

New design of the Primary Flight Information

Now

ALT

GS

UTC

DEST, DCT, MC Dist, ETA

More chart visible

For continuity: In submenus the infobox remains as known

Before

Pressing fewer buttons: Zoom changes automatically to the next chart

Customer experience:

„the new zoom-function, the automatic change from one chart to the next bigger or smaller scale is a great benefit for the work in the cockpit.

Due to the fast operability the „Eyes in“-time (view into the cockpit) is reduced to a minimum and raises the situation awareness towards airspace and other air traffic enormously.

An absolutely perfect step into the right direction - in a time in which the workload inside the cockpit rises immensely.
THANK YOU VERY MUCH!"

by Andreas Gafner, CEO
of Swiss Skyways Services
AG

Zoom changes automatically to the next chart.

The pilot arranges the priority of charts according to his needs.
